SUMMARY

Detail-oriented and highly motivated Web Developer with a strong passion for computers and web technologies, particularly in translating designs into clean, efficient and maintainable-code. I am a collaborative team player with strong interpersonal skills and a proven ability to deliver real world projects. Seeking a rewarding role as a Frontend Developer, with the goal of growing into a Full Stack developer while continuously expanding my technical skill set and advancing my professional and academic development.

EDUCATION

BSc. Mechanical Engineering: KNUST, OBUASI CAMPUS **(**Obuasi**)**
2020 - 2024

General Science: ACHIMOTA SCHOOL, (Achimota-Accra**)**
2017 – 2020

EXPERIENCE

Working Experience

NATIONAL SERVICE PERSONNEL, VOLTIC GHANA LIMITED, MEDIE.
1st October 2024 – September 2025

- Worked as a *blow-moulder machine operator* and *engineering help* (technician) in the manufacturing department.
- Worked as an *office clerk*: mastered work tools including **SAP**, **MS Office Suite** (Enterprise Edition).

INTERNSHIP, AGA (AngloGold Ashanti) GHANA OBUASI.
9th – 24th September 2023

- Worked at the Surface Mining Infrastructure, Pastefill Plant, Workshop and Shafts and Winders: engaging in mainly maintenance operations.
- I received further training in tool handling and machine operations and partook in maintenance activities at other locations including Sansu Genset and renovations at KMS Winders.

Software Development Projects

[1] Remark

GitHub Repository
- A lightweight comment section app powered by Convex and Clerk.
- It uses Convex's real-time sync feature to update UI instantly after any changes are made. Almost every action in Remark is persisted to local storage so the user doesn't lose progress even after even page refresh.

    Website | Getting Started

[2] Nard Development Kit (ndk)

GitHub Repository
- An open-source react library that packs shadcn/ui components, themes, utilities, motion presets, hooks etc. into NPM packages and a free UI registry on the project's website.
- The kit also contains custom UI blocks (built on top of radix primitives) for building user interfaces of every kind, including heroes, navbars, footers, CTAs and many more.
